Change the Eye Color

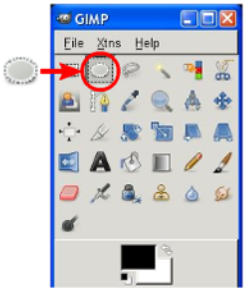

Before

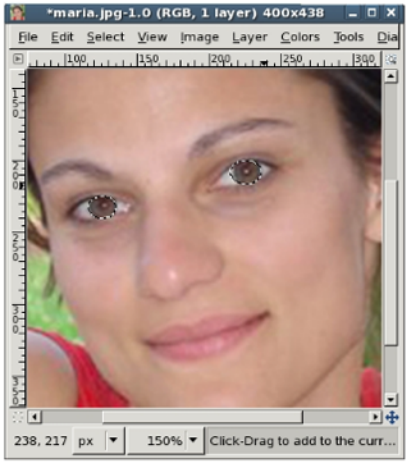

After

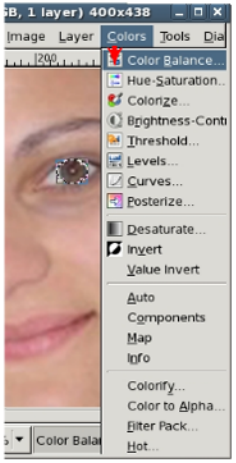

1 Select the **ellipse-select tool** from the **toolbar** to **select an elliptical region.**

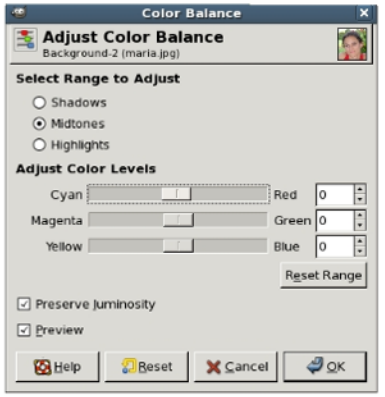

2 Use the ellipse-select tool to **select the right iris, the right pupil, the left iris and the left pupil.**

3 Select **Colors> Color Balance** from the **image menu bar** to **adjust color distribution.** You will see a new dialog appear.

4 Set the **Cyan/Red** slider from **0** to **-16**, the **Magenta/Green** slider from **0** to **39** and the **Yellow/Blue** slider from **0** to **18** in the **Color Balance** dialog.
